Description

The Draco 27 RS is a boat that combines the Scandinavian heritage of the legendary Draco shipyard with the contemporary design and high-level engineering of Windy Boats. Conceived as a modern, lightweight, and exceptionally balanced *sports cruiser*, it stands out for its clean aesthetics, agility in the water, and its ability to offer a sporty sailing experience without sacrificing comfort.

This **2016** unit, equipped with a powerful **Suzuki DF-350 ATX** and **278 hours of use**, offers firm, silent, and highly controlled behavior at sea. Its deep and stylized hull guarantees a clean and stable passage through the waves, even at high speeds, while the **hydraulic flaps** and **bow thruster** add precision in port maneuvers and stability in navigation. It is a set that transmits safety and sporty sensations in equal parts, responding smoothly throughout the entire revolution range.

The deck stands out for its open, comfortable, and fully functional design. The spacious cockpit houses a versatile seating area with an **integrated refrigerator**, ideal for days at anchor or coastal cruising. The helm station, protected and ergonomic, features clear instrumentation and a **12" Raymarine multifunction display** accompanied by a **depth sounder**, ensuring total control over navigation and depths. For onboard music, it incorporates a **FUSION** system, synonymous with quality and atmosphere. Added to this is a generously sized **bimini** that provides protection on sunny days.

As for maneuvering and anchoring equipment, the boat includes an **electric windlass**, robust handrails, and a deck layout designed to move comfortably and safely. The quality of construction is evident in every detail: from the finishes to the structural solidity, characteristics that have made modern Dracos a popular choice for those looking for a sports boat with a premium level of design.

Currently available in **Empuriabrava**, this Draco 27 RS is delivered with a **review performed by Nautic Luis**, presenting itself as an exceptional opportunity for those who want an elegant, fast, modern, and meticulously equipped boat. A perfect option to enjoy the coast with style, comfort, and the reliability of the best Scandinavian design.
