Description

The **Parker Sorrento 100** is a boat designed for those looking to broaden their plans at sea without compromising on performance, protection, or versatility. This type of boat combines the character of a high-end day cruiser with the real capability of a weekender, offering open social spaces, two cabins, and cruising defined by the efficiency of the Parker hull.

A boat designed to explore more

The Parker Sorrento 100 represents Parker’s most advanced vision: an action platform ready for day trips, weekend getaways, and longer cruises with greater autonomy. With **10.48 m overall length**, **3.15 m beam**, and **twin outboard engines of 2 x 300 HP**, this boat delivers a dynamic, precise, and efficient response. Its Twin Step hull is designed to reduce friction, improve planing, and make the most of outboard power. Approved for **10 people in category B**, it is an ideal option for the dynamic explorer who wants their boat to adapt to every day on the water.
