## DESCRIPTION

The Parker 780 Escape presents itself as a spacious and well-equipped day boat, offering the ideal combination of performance and comfort. With a length of 7.86 meters and a Beam of 2.50 meters, it provides a balance between size and maneuverability. Its stepped hull design not only improves top and cruising speed, but also optimizes overall performance and reduces fuel consumption, resulting in more efficient and environmentally friendly navigation.

Its interior configuration allows two people to be comfortably accommodated below deck, where there is also a separate toilet and practical storage spaces for luggage, which can be extended if you choose to equip the cabin with additional lockers and furniture. On deck, the capacity of up to 8 people makes the Parker 780 Escape an ideal choice for group day trips.

The vessel has a 230-liter fuel tank and a 40-liter water tank, supporting a maximum engine power of 350 hp. With a CE rating of 8/B, it ensures safety and comfort for coastal navigation.

The recognition as European Powerboat of the Year 2023 in the category up to 8 meters attests to its excellence and the quality of its design and construction, making it stand out in the competitive European nautical market.
