Description

The Windy 40 Camira is a true Scandinavian *sports cruiser* that combines elegant design, excellent performance, and a high level of comfort. Built on Windy's renowned deep-V hull philosophy, the Camira offers precise handling, great stability, and exceptional sea-keeping, while always maintaining the build quality and refinement characteristic of the Norwegian brand.

This 2024 Windy 40 Camira, equipped with twin Volvo Penta D6-440 DPI engines, offers a magnificent combination of performance, efficiency, and ease of maneuverability. Its powerful engines allow for both comfortable, relaxed cruising and the sporty performance typical of a true Windy.

Designed for both day trips and longer stays on board, the 40 Camira features a spacious and welcoming cockpit, generous seating areas, a large aft sunbed, and a deck layout designed to make the most of the available space. Below deck, its interior combines contemporary Scandinavian design with premium materials, creating an elegant and comfortable atmosphere.

With its sleek silhouette, excellent sailing qualities, and the power of its twin Volvo Penta D6-440s, the Windy 40 Camira perfectly represents the Windy philosophy: a vessel conceived for the joy of navigation, where performance, build quality, and comfort are combined without compromise.
