Description

The pre-owned Nimbus T8 represents one of the most balanced interpretations of the modern Scandinavian day cruiser concept. Designed for those seeking agile, safe, and comfortable navigation, the T8 combines the characteristic sporting spirit of Nimbus with extraordinary attention to space distribution, ergonomics, and build quality.

This unit, manufactured in 2023, stands out as an especially attractive opportunity: a boat that is practically new, with very little use and a highly sought-after equipment configuration.

Equipped with a **300 hp Mercury Verado V8 engine**, this Nimbus T8 offers powerful and progressive performance, ideal for both quick day trips and longer coastal voyages. With only **46 engine hours**, the mechanical assembly is in a very early stage of its service life, guaranteeing many seasons of enjoyment for its next owner. Furthermore, the single-engine configuration provides precise and balanced maneuverability, perfectly aligned with the dynamic character of the hull.

One of the most notable features of this unit is the **bow thruster**, a highly valued piece of equipment that considerably facilitates harbor maneuvers and docking in tight spaces. This system allows for precise control of the boat, reducing stress during mooring maneuvers and improving the boating experience, even for less experienced skippers. This is an extra that significantly increases handling comfort and reinforces the premium positioning of this pre-owned Nimbus T8.

On deck, its clean and elegant finishes enhance both the aesthetics and functionality of the boat, giving it a timeless appearance. The exterior layout is designed to make the most of the available space, offering ample seating areas, comfortable circulation, and a general sense of order and solidity, which are hallmarks of Scandinavian design.

The Nimbus T8 also stands out for its **great versatility**. It easily adapts to different owner profiles: from those who prioritize sporty outings and fast navigation to those seeking a comfortable boat for enjoying days at anchor, exploring the coast, or sharing moments on board with family and friends. All this is accompanied by a level of finish and build quality that places this model among the benchmarks in its category.

In short, this **2023 pre-owned Nimbus T8, equipped with a 300 hp Mercury Verado V8 engine**, represents an exceptional opportunity for those wishing to acquire a modern, practically new, and well-equipped boat, avoiding the lead times associated with manufacturing a new unit.
