Description

The **Windy 40 Camira RS** is once again available in Spain through Nautic Luis, exclusive importer of Windy. A vessel designed for the discerning navigator who values performance at sea, construction precision, and an elegance that endures over time.

Her exterior profile combines balanced lines with a distinctive Scandinavian identity. Inside, the work of Design Unlimited provides a refined and contemporary atmosphere, with carefully selected materials and different configuration possibilities. The two layout alternatives allow the accommodation area to be adapted to each owner's needs.

The helm station has been designed to offer an ergonomic driving position, clear instrumentation readability, and precise vessel control. Every element is arranged so that navigation is intuitive, stable, and fully connected with the sea.

The deck is designed for enjoying long days aboard. The cockpit offers an ample social area, while the convertible table allows the space to be adapted to each moment. The generous *garage* facilitates storage of water toys and equipment, keeping the deck tidy and available for leisure.

The Windy 40 Camira RS reflects the Norwegian shipyard's philosophy: construction executed with millimetric precision, discreet design, and impeccable navigation. A new unit available for those seeking a vessel capable of delivering performance, comfort, and uncompromising quality.

Contact Nautic Luis to learn about her configuration, equipment, and availability conditions.
